

Chief, Budget Division

15 March 1955

Comptroller

Information for Clark Committee

1. Col. White called this morning and stated that he had to prepare an answer to the following at the request of the Clark Committee:

"A discussion of the proportion of time or assets which should be devoted towards production and that devoted to administration or support."

2. The only basis which I can think of to approach this problem is that of manpower and funds distribution. If you have any ideas in addition to this approach, please proceed accordingly. Col. White desires whatever you have to offer by close of business today.
